Blatt 16

Hannah Rotgeri'

Aufgabe 32

a) -> Poissonverteilung 
$$P_{\lambda} = \frac{\lambda}{\lambda} e^{-\lambda}$$

L(\lambda) = \frac{\lambda}{\lambda} \times^{\lambda} \tim

X zu hoch, deswegen

$$\frac{\partial}{\partial x}(\ln(x)) = \left(\frac{1}{2}\sum_{i=1}^{\infty} \frac{1}{2}\sum_{i=1}^{\infty} (-x_i)\right) = 0$$

$$S^{2}(x,-x) = 0$$

a) mut never Datensatz. 
$$\frac{1}{24}$$
 =  $\frac{1241}{2}$ .
